Eureka!

Puzzles • Toys • Games

Brainteasers and puzzles have been our hardcore business for more than 30 years now. This is a very specialized “niche” market with its limits, but we always preferred this over getting lost in mass market.

Up until today we haven’t found any big distribution retailer that appreciates our “niche” profile and values, which subsequently makes our items rather exclusive. With the present growing e-commerce this now turns out to our benefit, as you may find our items somewhere available online, globally(!).

Therefore, it’s our intention to keep our focus on “niche” items and who knows what our expertise may bring us in the future?

*Jo Wils

Eureka! 3D Puzzles since 1989

Those who pay close attention will see it!

Almost all puzzle companies that sell 3D wooden puzzles have the same designs in their range. Small or large, light wood or dark. Sometimes with a pop of colour. But so often the same puzzles.

A well-known Chinese manufacturer confessed to us they have no idea where they come from, but produced millions of them. With my approximately 40 years in the puzzle industry, I think I do know the origin of some designs. Some go back as far as 1,000 years!

We are reintroducing them to the market in a historically common size. Roughly 8cm. Not made from the cheapest wood but from special woods such as Red Padouk, Black Walnut and White Maple. And on the packaging, I provide some specifics about their origin. That way, the knowledge is not lost.

Jo Wils
CEO Eureka bv

Puzzles with a story:

Very Important Puzzles in
3D Puzzle history.

Woodchuck puzzle

The chuck puzzle system was invented and patented by Edward Nelson in 1897. Improved by Ron Cook of the UK company Paradox Eng. Ltd. AKA Pentangle Puzzles, during the 1980s and 90s. They produced a series of chucks in which a given number of simple bridge-like pieces and one or more key pieces with an extra notch, could be built into a variety of self-sustaining three-dimensional shapes. For creating bigger chuck puzzles, at that time named Papachuck (54 parts), Grandpapachuck (96 parts) and Great-Grandpapachuck (150 parts) by Cook, one would need to add longer pieces. This idea can also be used to create asymmetric shapes, assembled exactly according to the same principle as this Woodchuck puzzle. This feature is unique to chuck puzzles.

earlier than 1890

Altekruse block puzzle

Patented on June 17, 1890 by William Altekruse (USA). This burr puzzle is named after the patentee. Although, in all likelihood, the puzzle is of earlier origin. William immigrated to America in 1844 and most likely brought the idea with him from his homeland. The name "Altekruse" is of Austro-German origin and means "old cross" in German. Apparently, when he drew up the patent, William was only aware of the simplest one-axis solution. But in fact there are three solutions, depending on whether the assembly occurs along one, two or all three axes. This in itself supports our idea that he was not the original inventor.

A classic Altekruse puzzle consists of 12 identical parts. This can only be dismantled by sliding a complete section to one side before any pieces can be removed. Puzzle designer Stewart Coffin discovered 14, 36 and 38 piece variations. This type of puzzles is unusual because all parts are identical.

20th century

Urania puzzle

This burr puzzle is a perfect example to illustrate the impact of a 'key' puzzle part. With the key part well positioned, another part can be removed. When then taking out the key part from the whole, the remaining puzzle parts may collapse into bits & pieces.

To this day, even the world's greatest puzzle collectors do not know who designed this typical burr puzzle. We do know that Mr. Robert Dalloz, an established wooden puzzle manufacturer in the 1980's and 90's, based in France's Jura region, added this puzzle design to his production programme sometime in the 90's. Primarily promoted under the brand names Arjue (Uranie) and Janod Casse-têtes (CT06), this puzzle became popular and well-known around the world. But we do believe this puzzle has more history than this.

>1000 years old

Lock-block burr

Not a traditional burr puzzle, however still a burr. A burr puzzle is an interlocking puzzle consisting of notched sticks, combined to make one 3D, usually symmetrical unit. Quality burr puzzles are precision-made for easy sliding and accurate fitting of the parts. In recent years the definition of "burr" is expanding, as puzzle designers use this name for puzzles not necessarily of stick-based pieces. This lock-block puzzle is a perfect example.

The term is attributed to the finished shape of many of these puzzles, resembling a seed burr. The term "burr puzzle" is officially mentioned for the first time in a 1928 book by Edwin Wyatt, but the text implies that it was commonly used before. Records of such puzzles can be found in German catalogues from the late 18th century and early 19th century. Also, an engraved image in an encyclopaedia from 1698. But there are claims of the burr being a Chinese invention, like other classic puzzles such as the Tangram. The puzzle known as "The Chinese Cross" is in fact the most well-known and presumably the oldest of burr puzzles. That makes the burr puzzle over 1000 years old.

3 worlds come together

Nexus puzzle

Whereas wooden puzzles are usually constructed symmetrically, here you can notice an optical difference, which not only makes this puzzle look more special. It's the combination of bridge-like chuck parts with classic burr parts with a notch, that result in an apparently asymmetrically sectioned Chinese Cross puzzle. But where the historical Chinese Cross puzzle locks itself with 1 solid key piece, an unnotched stick that slides easily out, there's more going on here.

- + The Chinese Cross Puzzle is said to date back more than 1,000 years.
- + In the UK, as early as 1698, there has been signs of what we now call 'burr' puzzle parts.
- + In the US, chuck puzzle pieces are officially known to us since 1897.

Or how puzzle systems from other times and worlds can merge into one beautiful whole!

18th century

Japanese dice puzzle

Little is known about the early history of this puzzle design but puzzles very similar to this were certainly already produced in both Asian and European countries as early as the 18th century. In the 1803 catalogue of Fa. Bestelmeier, a German toy manufacturer, there were 2 images of such puzzles.

Puzzles of this type were mainly made in Germany, but by the late 1930s the market had been largely captured by Japanese manufacturers. Yamanaka Kumiki Works Co. being one of them. Since then, this particular puzzle system can be found in several geometrically shaped puzzles, such as a sphere, a cube, a barrel, etc.... Japanese puzzles of this kind are called, you'll never guess, "Kumiki" and are believed to be related to the traditional construction of wooden buildings where no nails or glue were used.

Hectix Puzzle

By Stewart T. Coffin

This puzzle idea was discovered first by Bill Cutler around 1965 and independently by Stewart T. Coffin in 1968. Stewart is known as "the world's foremost creator of interlocking puzzles"! With only a slight variation in the notches, this puzzle is based on Stewart's original Hectix design. Designed and cast in epoxy in late 1968. Patented in 1973 (US-patent no. 3721448). Made from 12 hexagonal sticks with notches. This puzzle marked the beginning of his puzzle company. In 1970, a license was granted to the company 3M for production in injection-molded styrene. In 1976, the license was transferred to Avalon Hill until 1979. Approximately 100.000 pieces were sold, which was a huge success at the time. The current location of the mold is unknown, which any enthusiast puzzle collector would cherish to find. Stewart, born in 1930 and still alive at the time of this release, has personally given us permission to reproduce his puzzles.

The Nest-Pin Puzzle

By Stewart T. Coffin

A combination of Stewart T. Coffin's 'Nest' designs and his 'Pin-Hole' puzzle. Both created in 1976. Our design is a light version of his Cuckoo's Nest and Locked Nest. We drilled holes at a 90° angle, while Stewart used a 70° angle. When assembling or disassembling this Nest-Pin puzzle, the relationship with his Pin-Hole design becomes clear. Stewart T. Coffin, born in 1930, is an American puzzle maker. He is considered by many to be one of the best designers of polyhedral interlocking puzzles in the world. Puzzles designed by Stewart may be freely reproduced, provided you contact him in advance and send him a few copies. Stewart, still alive at the time of this release, has personally given us permission to reproduce his puzzles.

SIXI Cube puzzle

By Vinco

Created by Vaclav Obsivac (nickname Vinco) from the Kingdom of Wallachia in the Czech Republic. Vinco was born in 1962 and had a natural interest in symmetrical geometric shapes made from beautiful types of wood. His interest in puzzle making began in 1999, thanks to a world puzzle championship in Brno, Czech Republic. Inspired by the work of Stewart T. Coffin, Tom Lensch, Philippe Dubois, Pelikan Puzzles and others, Vinco designs and produces various types of puzzles, including packing puzzles and interlocking puzzles. However, most of his puzzles work on the basis of coordinated movements. This SIXI Cube puzzle is one of his simpler interlocking creations, allowing you to become acquainted with his designs. But beware, we included some science as a challenge.

Anno 2005 to 2022

Akaho Puzzle

By Vinco

From the Kingdom of Wallachia in the Czech Republic, we bring you this pin & hole packing problem, devised by puzzle designer Vaclav Obsivac (nickname Vinco). The Akaho puzzle is part of Vinco's 'HoWeDia' project. This project is a perfect example of how new puzzle designs and names come about, or how puzzle brains think. In this case, it concerns the transformation of Vinco's puzzle design 'Eight Houses', created in 2005, into this 'Akaho' puzzle, created in 2022. Have we made your eyes light up? Take a look at the download section on his website vinco.cz.

Extra bonus: Think -outside the box- and look for more pin & hole fitting shapes. And a creative mind turns an XXL version into a puzzle coffee table and side tables.

Sliding Six Brothers Kongming Lock

By Johoson Zhao

A masterpiece by Johoson Zhao from China. With over ten years of experience, Johoson is a seasoned professional with a passion for designing toys and puzzle-like items. He has designed numerous classic puzzles that have sold well worldwide.

This 6-piece shiftable Kongming Lock is an upgraded version of his 4-piece Kongming Lock, which had a medium difficulty level. Although this new design uses similar core principles, its difficulty level has been significantly enhanced. Both assembling and disassembling this lock, will challenge your patience and spatial reasoning skills. Even when following the instruction manual closely. Undoubtedly, a puzzle with an extremely high level of difficulty.

FYI: 'Kongming Lock', meaning 'Chinese Puzzle', refers to Chinese military strategist Zhuge Liang. (aka Kongming / 220-280 AD)

Triangular Kongming Lock

By Johoson Zhao

A blockbuster from Johoson Zhao from China. A senior designer with over 10 years of experience. Johoson is passionate about researching different types of toys and skilled in designing puzzle products. He has designed many classic puzzles that sell well worldwide.

This Triangular Kongming Lock draws on the concepts of combined force assembly and disassembly from traditional Kongming Locks, and incorporates mathematical principles into its design. After multiple sampling trials and repeated refinements it has been successfully developed. Undoubtedly a real tour de force.

FYI: 'Kongming Lock', meaning 'Chinese Puzzle', refers to Chinese military strategist Zhuge Liang. (aka Kongming / 220-280 AD)

MARBLE CIRCUIT™

Marble Circuit The logic game of paths and possibilities!

The Goal: Choose a challenge card and place the starting tiles on the board as indicated on the card. Note the numbers in the target spaces on the card. These numbers indicate the number of marbles that should end in these spaces. Predict the paths of the marbles and add the remaining mystery tiles. Slowly slide the gate to the right to release the marbles.

Marble Circuit Das Logikspiel der Wege und Möglichkeiten!

Spielen:
Wählen Sie eine Herausforderungskarte und legen Sie die Startfelder wie auf der Karte angegeben auf das Spielbrett. Beachten Sie, die Zahlen in den Zielfeldern auf der Karte. Diese Zahlen geben die Anzahl der Murmeln an, die in diesen Zielfeldern enden sollen. Sagen Sie die Wege der Murmeln voraus und legen Sie die verbleibenden geheimnisvollen Felder auf das Spielbrett. Schieben Sie das Tor langsam nach rechts, um die Murmeln freizugeben.

Marble Circuit El juego lógico de caminos y posibilidades.

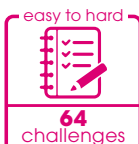

Objetivo: Elige una tarjeta con un reto y coloca en el tablero las piezas fijas tal y como se indica en la tarjeta. En la tarjeta también se indica un número en cada meta. Este número es la cantidad de bolas que tiene que llegar a esa meta. Piensa en qué caminos recorrerán las bolas y coloca en el tablero el resto de piezas. Retira despacio la barrera deslizándola hacia la derecha para soltar las bolas.

MARBLE CIRCUIT

item # 473557
EAN-13 # 5425004735577

Marble Circuit Il gioco di logica di percorsi e di opportunità.

Obiettivo: Scegliete una carta sfida e posizionate le tessere iniziali sul tabellone come indicato sulla carta. Notate che le tessere iniziali sono raffigurate a colori sulla carta. Nelle posizioni finale noterete dei numeri. Questi numeri indicano quante biglie dovranno finire in ognuno di questi spazi. Cercate di indovinare i percorsi delle biglie e posizionate le restanti tessere misteriose sul tabellone. Fate scorrere lentamente la barriera verso destra per liberare le biglie.

Marble Circuit Le jeu de logique aux multiples parcours et possibilités!

Choisissez une carte défi et disposez les tuiles de départ sur le plateau comme indiqué sur la carte. Notez les chiffres dans les cases cibles sur la carte. Ces chiffres indiquent le nombre de billes qui doivent arriver dans chaque case. Prédisez la trajectoire des billes en plaçant les tuiles mystères restantes sur le plateau. Faites glisser lentement le portail vers la droite pour libérer les billes.

Marble Circuit Het logische spel vol paden en mogelijkheden!

Doel van het spel: Kies een uitdagskaart en leg de gekleurde starttegels op het bord zoals aangegeven op de kaart. Let ook op de getallen in de doelvakken op de kaart. Deze getallen geven aan hoeveel knikkers er in elk doelvak moeten belanden. Voorspel het traject van de knikkers en voeg de resterende tegels toe. Schuif het hekje langzaam naar rechts om de knikkers los te laten.

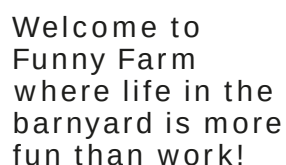

IL GIOCO

LE JEU

EUROPE

Each barnyard challenge shows you where to place the big tractor piece and one or two additional pieces on the barnyard base. Then simply fill in the remaining pieces. When each challenge is solved, the barnyard will be full with no empty spaces. So, what are you waiting for? Put on your overalls and start your tractor. It's time to cultivate those brain cells and plow up some fun!

Willkommen auf
der Funny Farm,
wo das Leben auf
dem Bauernhof
mehr Spaß macht
als die Arbeit!

Jede Bauernhof-Challenge zeigt Ihnen, wo Sie das große Traktorstück und ein oder zwei zusätzliche Stücke auf dem Bauernhof-Spielbrett platzieren müssen. Dann ergänzen Sie einfach die restlichen Teile. Wenn jede Herausforderung gelöst ist, ist der Hof voll und es gibt keine freien Plätze. Also, worauf warten Sie noch? Ziehen Sie Ihren Overall an und starten Sie den Traktor. Es ist Zeit, die Gehirnzellen zu kultivieren und etwas Spaß zu haben!

Benvenuti a
Funny Farm dove
nel cortile della
fattoria ci si
diverte di più che
a lavorare!

Ogni sfida da cortile ti mostra dove posizionare il pezzo con il grosso trattore e uno o due pezzi aggiuntivi alla relativa base. A questo punto, è sufficiente inserire i pezzi rimanenti. Quando avrai risolto tutte le sfide, il cortile sarà pieno e non ci saranno più spazi vuoti. Quindi, cosa aspetti? Indossa la tua salopette e accendi il trattore. È ora di coltivare quei neuroni e di arare un po' di divertimento!

DAS SPIEL

IL GIOCO

FUNNY FARM

item # 473548
EAN-13 # 5425004735485

Bienvenue à la ferme amusante où la vie dans la basse-cour est plus amusante que le travail !

Comment Jouer: Chaque défi basse-cour vous indique où placer la pièce du gros tracteur et une ou deux pièces supplémentaires sur la base de la basse-cour. Il suffit ensuite de tout simplement ajouter les morceaux restants. Lorsque chaque défi est résolu, la basse-cour sera complète sans espaces vides. Alors, qu'attendez-vous? Enfilez votre salopette et démarrez votre tracteur. Il est temps de cultiver ces cellules du cerveau et de labourer de l'amusement!

Welkom bij de Funny Farm, waar het leven op het erf meer plezier dan werk is.

Elke erfuitdaging toont je waar je het grote tractorstuk en een of twee bijkomende stukken op het erfbord moet plaatsen. Plaats vervolgens gewoon de andere stukken. Wanneer je de uitdaging correct hebt opgelost, zijn er geen lege ruimten meer op het bord. Waar wacht je nog op? Trek je overall aan en start je tractor. Het is tijd om wat hersencellen te kweken en plezier te oogsten!

TUT'S TABLET

Welcome to Tut's Tablet, a puzzle-maze treasure hunt!

To find the secret path to Tut's treasure, you must roll the cryptic cube from square to square always matching the color on the top of the cube with the color on the square below it. When you reach the square with Tut's coin and both colors match, you've solved the challenge. So what are you waiting for? Can you find Tut's treasure?

Willkommen bei Tut's Tablet, einer Schatzsuche im Puzzle-Labyrinth!

Um den geheimen Weg zu Tut's Schatz zu finden, müssen Sie den kryptischen Würfel von Quadrat zu Quadrat rollen, wobei Sie immer die Farbe auf der Oberseite des Würfels mit der Farbe auf dem Quadrat darunter decken. Wenn Sie das Feld mit der Tut-Münze erreichen und beide Farben übereinstimmen, haben Sie die Herausforderung gelöst. Worauf warten Sie noch? Können Sie Tut's Schatz finden?

Benvenuto a Tut's Tablet, un caccia al tesoro puzzle-labirinto!

Per trovare il percorso segreto verso il tesoro di Tut, devi far rotolare il Cubo Criptico di casella in casella facendo sempre corrispondere il colore della parte superiore del cubo con il colore della casella sottostante. Quando arrivi alla casella con la moneta di Tut e i due colori corrispondono, hai risolto la sfida. Allora cosa aspetti? Riuscirai a trovare il tesoro di Tut?

TUT'S TABLET

item # 473547
EAN-13 # 5425004735478

Bienvenue à la Tablette de Tut, une chasse au trésor dans un casse-tête labyrinthe !

Pour Jouer: Pour trouver le chemin secret vers le trésor de Tut, vous devez faire rouler le cube cryptique de case en case en faisant toujours correspondre la couleur de la face supérieure du cube avec la couleur de la case d'en dessous. Lorsque vous arrivez à la case avec la pièce de monnaie de Tut et les deux couleurs correspondent, vous avez résolu le défi. Alors qu'attendez-vous ? Pouvez-vous trouver le trésor de Tut?

Welkom bij Tut's Tablet, de schattenjacht in een puzzel-labyrint!

Om het geheime pad naar de schat van Tut te vinden, moet je de Cryptische Kubus zodanig van vakje naar vakje rollen dat de kleur van de bovenkant van de kubus overeenstemt met de kleur van het vakje eronder. Wanneer je het vierkant met de munt van Tut bereikt en wanneer beide kleuren overeenkomen, heb je de uitdaging opgelost. Waar wacht je nog op? Vind jij de schat van Tut?

CHEESE

Welcome to Say Cheese, the cheese rolling puzzle!

The Goal: Choose a challenge and arrange the blocks of cheese so all the mice tails are facing up. Then roll the cheese blocks within the grid until all mice heads are facing up. So What Are You Waiting For? Say Cheese!

Willkommen bei Say Cheese, dem Käseroll-Denkspaß!

Das Ziel: Wählen Sie eine Herausforderung und ordnen Sie die Käsewürfel so an, dass alle Mäuseschwänze nach oben zeigen. Rollen Sie diese Käsewürfel dann im Gitter, bis alle Mäuseköpfe nach oben zeigen. Worauf warten Sie? Say Cheese!

Benvenuto in Say Cheese, dove gli unici topi buoni sono i topi felici!

Obiettivo: Metti i topi dei colori richiesti dalla sfida nella posizione corretta, facendo attenzione che si veda dall'alto il lato con la coda. Per risolvere il rompicapo, fai rotolare tutti i blocchi formaggi sulla griglia in modo che si veda dall'alto il lato con la testa. Che aspetti? Fai cheese!

HEDGEHOG ESCAPE

Welcome to Hedgehog Escape, the spine-tingeling, hedge-hoppin' escape puzzle!

How does a hedgehog make his getaway? Through a hedge, of course!
The Goal: From the indicated start position of the rolling hedgehog piece, find the correct escape path, avoiding the biting badgers, to the low spot in the hedge and roll over it.

Willkommen bei Hedgehog Escape, dem spannenden, hecken-springenden Fluchtpuzzle!

Wie flieht ein Igel? Natürlich durch eine Hecke!
Das Ziel: Von der angegebenen Startposition des rollenden Igelteils müssen Sie den richtigen Fluchtweg zum tiefsten Punkt der Hecke und an den beißenden Dachsen vorbei finden und darüber rollen.

Benvenuti in Hedgehog Escape, il rompicapo ricci-rotolante! Come fa un riccio a fuggire? Scavalcando un bordo, ovviamente!

Obiettivo: Portare il gruppo di ricci in salvo accanto a mamma riccio. Per farlo dovrai farli rotolare nel giusto percorso di fuga, schivando i malefici tassi per raggiungere e scavalcare il bordo basso della plancia. Che aspetti? Rotola!

THE GAME

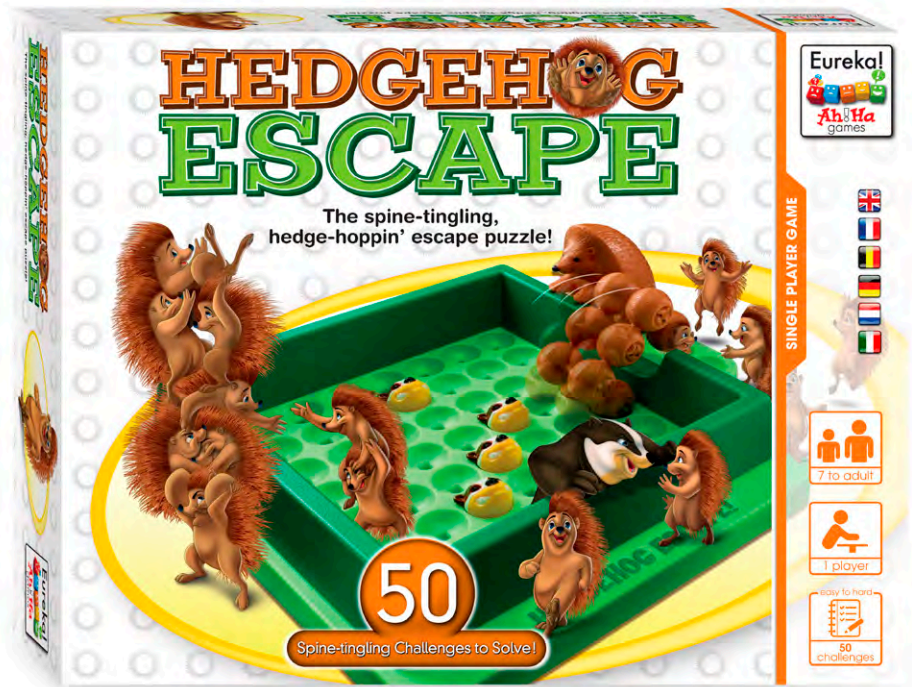

DAS SPIEL

IL GIOCO

HEDGEHOG ESCAPE

item # 473543
EAN-13 # 5425004735430

Bienvenue dans Hedgehog Escape, le casse-tête piquant qui fait sauter et rouler les hérissons !

Par où un hérisson s'évade-t-il ? À travers une haie, bien entendu !

L'objectif : Placez la pièce hérissons dans la position de départ indiquée et trouvez le chemin qui vous permettra de vous évader en évitant de vous faire croquer par les blaireaux. Rejoignez le point le plus bas de la haie et roulez par-dessus pour vous échapper.

Welkom bij Hedgehog Escape, de spannende, stekelige ontsnappingspuzzel!

Hoe vluchten egels? Door een haag natuurlijk! Het doel: Begin met de startpositie van het rollende egelstuk en zoek de juiste route om aan de bijtgrage dassen te ontsnappen en over het lage punt van de haag te rollen.

VCUBE
the 21st century cube
BENELUX

Powered by gravity. Solved by Genius!

NEW

**EXPECTED
MID-2026**

GRAVICUBE™

Welcome to a brand-new innovative puzzle experience! GraviCube™ isn't just another twisty toy—it's a revolutionary 3D puzzle that uses gravity as its core mechanic. It introduces an entirely new approach to mechanical puzzles. Instead of twisting faces manually, gravity triggers the movements—creating dynamic, fluid rotations that will challenge your visual logic.

GraviCube™ is patented worldwide and fully trademarked. Its premium quality combined with a fully customizable and eye-catching appearance offers a unique, exciting and intuitive challenge suitable for every age and gender.

Easy to pick up yet cleverly complex, GraviCube™ blends motion, rotation, gravity, and image alignment into a fresh and stress-free experience that will keep you coming back for more!

HOW IT WORKS

Every face of GraviCube™ combines:

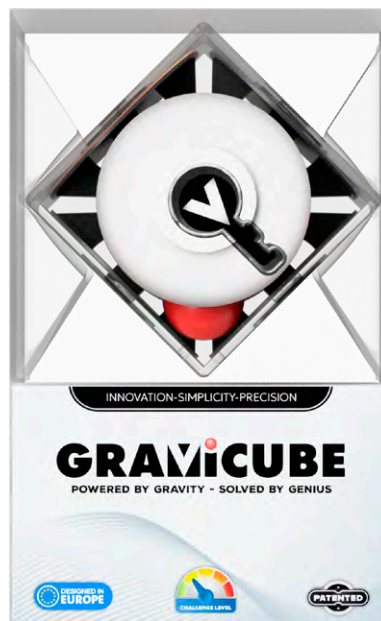

- > A fixed image disk
- > A rotating inner disc containing fragments of the same image

Start by pulling and completely removing the string to release the internal ball. Tilt, turn and rotate the cube to scramble the images. Then guide the ball while rotating the discs to bring all six sides back into alignment. It's intuitive, dynamic, and unlike anything you've tried before!

HELPFUL HINT

Unable to solve your GraviCube™?

Start by completing one side first, then carefully guide the ball to the opposite side and continue aligning the remaining images without rotating the starting side. If the cube doesn't solve, no worries—pick a different side to start with, and try again. Remember that the puzzle is solved only when the ball returns to its starting corner. Patience and precise movements are the key!

Puzzle size 68x68x68 mm / Packaging 100x70x185 mm

GRAVICUBE™

Minimal, elegant and familiar, this version features a striking key and keyhole motif with illustrated gravity-themed elements. As the inner discs rotate, the imagery shifts like a secret mechanism in motion. Solve the cube to “lock” everything back into place. The perfect introduction to the magic of gravity-powered puzzling.

NEW EXPECTED
MID-2026

560060 — EAN 5206457003501
GraviCube

GRAVICUBE™ TIME

A beautifully designed clock face decorates each side, but there's more: inside each clock lies an iconic world landmark—the Eiffel Tower, the Pyramids, the Great Wall, and more. Each clock shows the correct local time at the same moment around the globe, creating a clever time-zone puzzle wrapped in cultural imagery. Tilt to scramble the discs and then solve the puzzle, while learning about world landmarks, time zones, and global geography—making every play session both fun and educational.

MID-2026

Puzzle size 68x68x68 mm
Packaging 100x70x185 mm

GRAVICUBE™ NEWTON

Packed with colorful, playful illustrations of planets, astronauts, rockets, and cosmic gravity, this edition is designed to delight young explorers. Each image is split across the dual layers—scramble it, and your space world bursts into motion. Restore the artwork by guiding the ball and aligning the images like a true interstellar navigator. Fun, friendly, and fantastically dynamic!

GRAVICUBE™ MAZE

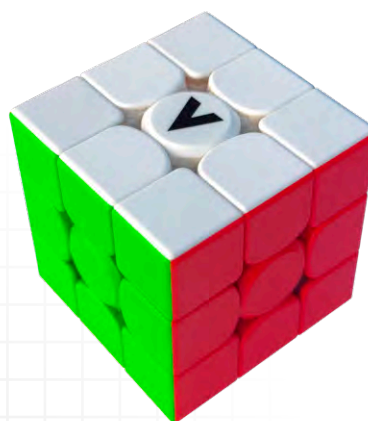

A bold, high-energy design featuring four glowing neon paths—red, green, blue, and yellow—stretching across three sides each. The lines cross, merge, and weave across the cube, forming a mesmerizing maze of intersecting routes. When scrambled, the paths break apart into chaotic fragments. Guide gravity and rotate the discs to reconstruct the continuous neon trails. A visually striking challenge with a futuristic electric vibe.

V-Sphere [sliding 3D puzzle]

(sphere)

It is an eye-catching, innovative spherical sliding 3D-puzzle that will challenge, excite and amaze male and female people of every age. Everyone will immediately stick with the puzzle once it's scrambled and will leave it from her/his hands only after having it solved!

The "V-Sphere" is a light but sturdy puzzle with permanent vibrant colors and the smoothest sliding play you can ever imagine! The sophisticated puzzle concept combined with the highest European manufacturing quality, warrants the ultimate user satisfaction.

The V-Sphere consists of 8 fixed colored spherical triangles. The 7 of them are surrounded by 12 colored moveable rectangular pieces while the latter triangle is surrounded by 11 pieces leaving always a gap. This empty space gives the ability to the user to slide the moveable parts around the sphere. The goal of the puzzle is to match the colored moveable parts to the colored fixed triangles. The V-Sphere is a worldwide patent, invented, designed and made in Greece.

You'll never leave without!

Fig. 1 — A scrambled V-Cube 5,
waiting to be solved.

Challenged to uniform coloured sides!

V-Cube mind games' revolutionary approach led to an innovative construction that is going far beyond the traditional 5-layered cubes that was believed to be unattainable for over 20 years! Our technology made the construction of a smooth rotating cube with an unlimited number of layers possible.

V-Cube™ 2 [pillow]

[pillow]

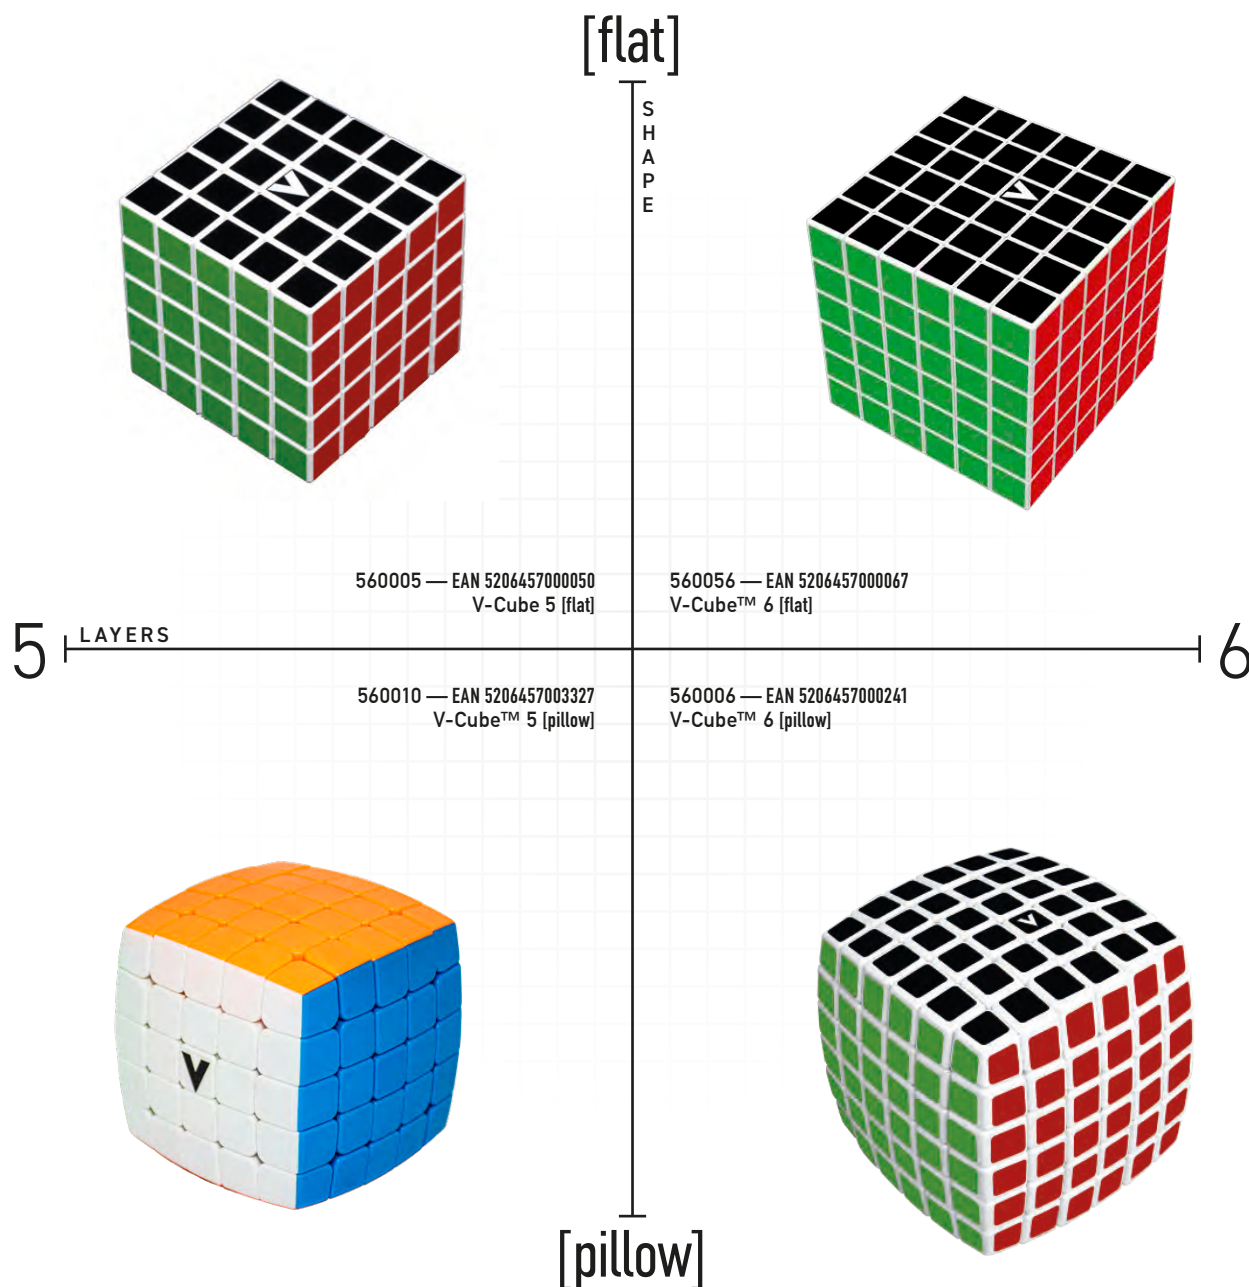

V-Cube 2 is the smallest version of the V-Cube family. This flat or pillow-shaped V-Cube is derived from the original V-Cube 7 with its revolutionary mechanism & internal pieces. V-Cube 2 has almost 3.7 million possible permutations. It consists of 26 smaller pieces, 8 of them are the visible corners; and the solid cross that supports them, enabling them to rotate independently on based axes.

V-Cube 3 is the 3x3x3 version of the V-Cube family. This flat or pillow-shaped V-Cube is derived from the original V-Cube 7 with its revolutionary mechanism & internal pieces. V-Cube 3 has 4.32×10^{19} possible permutations. It consists of 26 smaller pieces and the solid cross that supports them, enabling them to rotate independently on based axes.

V-Cube 4 is the 4x4x4 version of the V-Cube family. This flat or pillow-shaped V-Cube is derived from the original V-Cube 7 with its revolutionary mechanism & internal pieces. V-Cube 4 has 7.40×10^{45} possible permutations. It consists of 98 smaller pieces, 56 of them are visible; and the solid cross that supports them, enabling them to rotate independently on based axes.

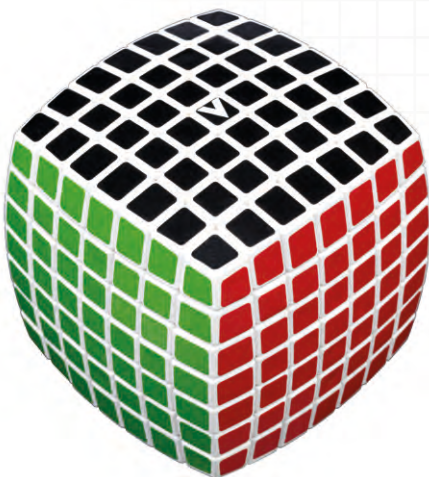

V-Cube 5 is the smoothest & sturdiest five-layered cube available in the market! It consists of 98 small pieces — called cubies — and the solid cross that supports them, enabling them to rotate independently on based axes. The possible number of permutations of the V-Cube 5 is 1.83×10^{24} !

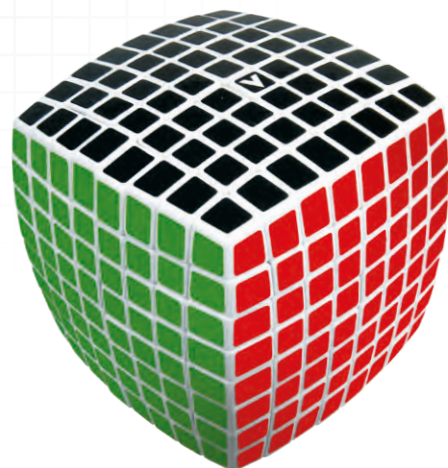

V-Cube 6 is the 6x6x6 version of the V-Cube family. This flat or pillow-shaped V-Cube is derived from the original V-Cube 7 with its revolutionary mechanism & internal pieces. V-Cube 6 has 1.57×10^{16} possible permutations. It consists of 218 smaller pieces, called cubies and the solid cross that supports them, enabling them to rotate independently on based axes.

[pillow]

V-Cube 7 is an uniquely designed and constructed skill game. It is a multi-coloured, seven-layered cube, rotating smoothly on based axes. V-Cube 7 has 1.95×10^{160} possible permutations. It consists of 218 smaller pieces, called cubies and the solid cross that supports them, enabling them to rotate independently on based axes.

The V-CUBE 8 brings the daring player a step closer to the ultimate challenge! If the challenge is never enough for you the "big 8" is the way to go. The V-CUBE 8 is a uniquely designed and constructed skill game. It is a multi-colored, 8-layered cube that rotates smoothly on based axes. This XXL size cube offers exceptional rotational performance in combination of a prestigious reputation as one of the world's ultimate cube solving challenges. V-CUBE 8 has 3.52×10^{211} possible permutations and weighs 425g! It consists of 324 small -cubies and a solid-cross for supporting their independent rotation on based axes.

MADE IN THE USA

NL Elke Cobble Hill-puzzel is ambachtelijk geproduceerd en van museumkwaliteit. Wij gebruiken de beste inktsoorten en lakken. Onze puzzels hebben een papieren toplaag met linnenstructuur. Verder gebruiken wij topkwaliteit plaatmateriaal en 100% gerecycled spaanplaat. De puzzelstukjes hebben willekeurige vormen. Dat maakt onze puzzels interessanter om te maken, want geen twee stukjes zijn gelijk.

FR Tous les casse-têtes de Cobble Hill sont d'une qualité digne d'objets qu'on retrouverait dans des musées. Ils sont faits à l'aide des encres et vernis les plus raffinés du marché, de papier texturé à effet lin, de carton bleu de qualité supérieure et de carton gris 100 % recyclé. Leurs pièces sont découpées de façon aléatoire et donc toutes différentes, ce qui rend l'assemblage encore plus intéressant.

EN Each and every puzzle from Cobble Hill is crafted to our museum-quality standards, using the finest inks and varnishes. Our puzzles feature linen textured paper and premium grade blue board, and use 100% recycled chipboard. The pieces are random-shaped, which means our puzzles are more interesting to assemble because no two pieces are alike.
